leverancier test
mogelijkheid
veilig services
deployen software
bestaande
extra gebruik
snel

Eisen

- Via internet
- Vanaf voorgedefinieerde locaties

- Alleen resources betalen die gebruikt worden
- Geen investeringen

Toegang

Security

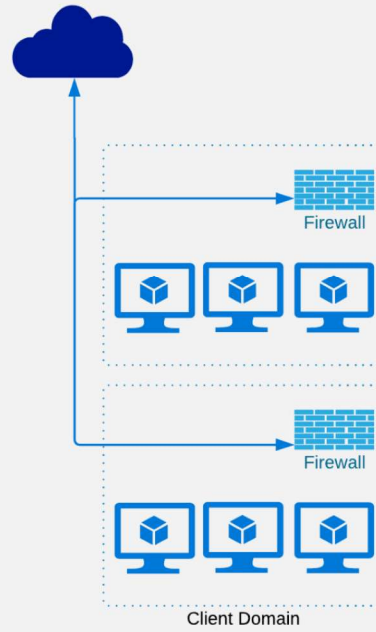

- Gecontroleerde toegang tot internet
- Bestaande AD
- Gecontroleerde toegang tot back-end services

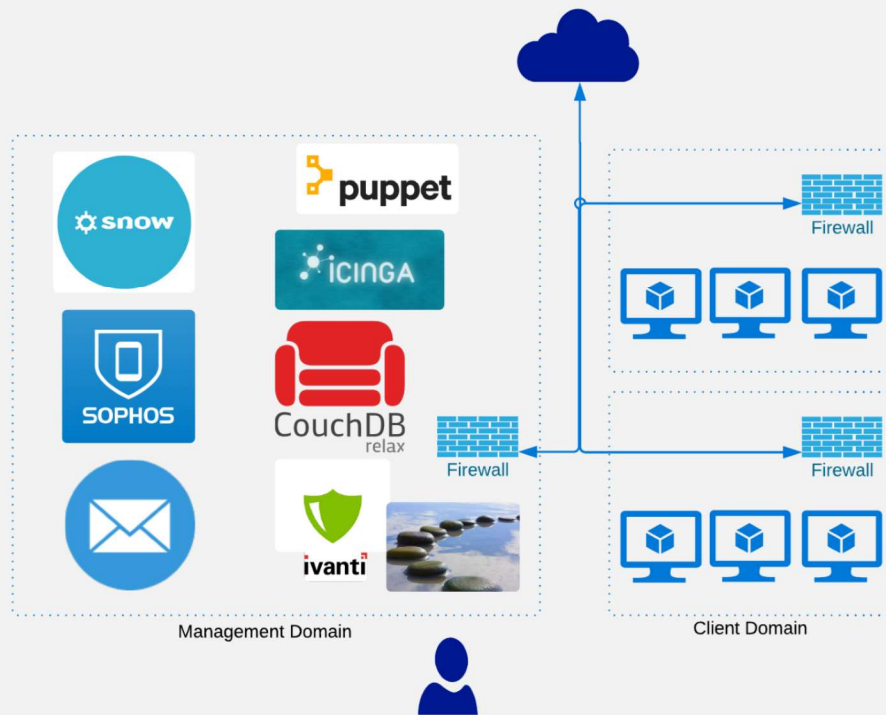

Kosten

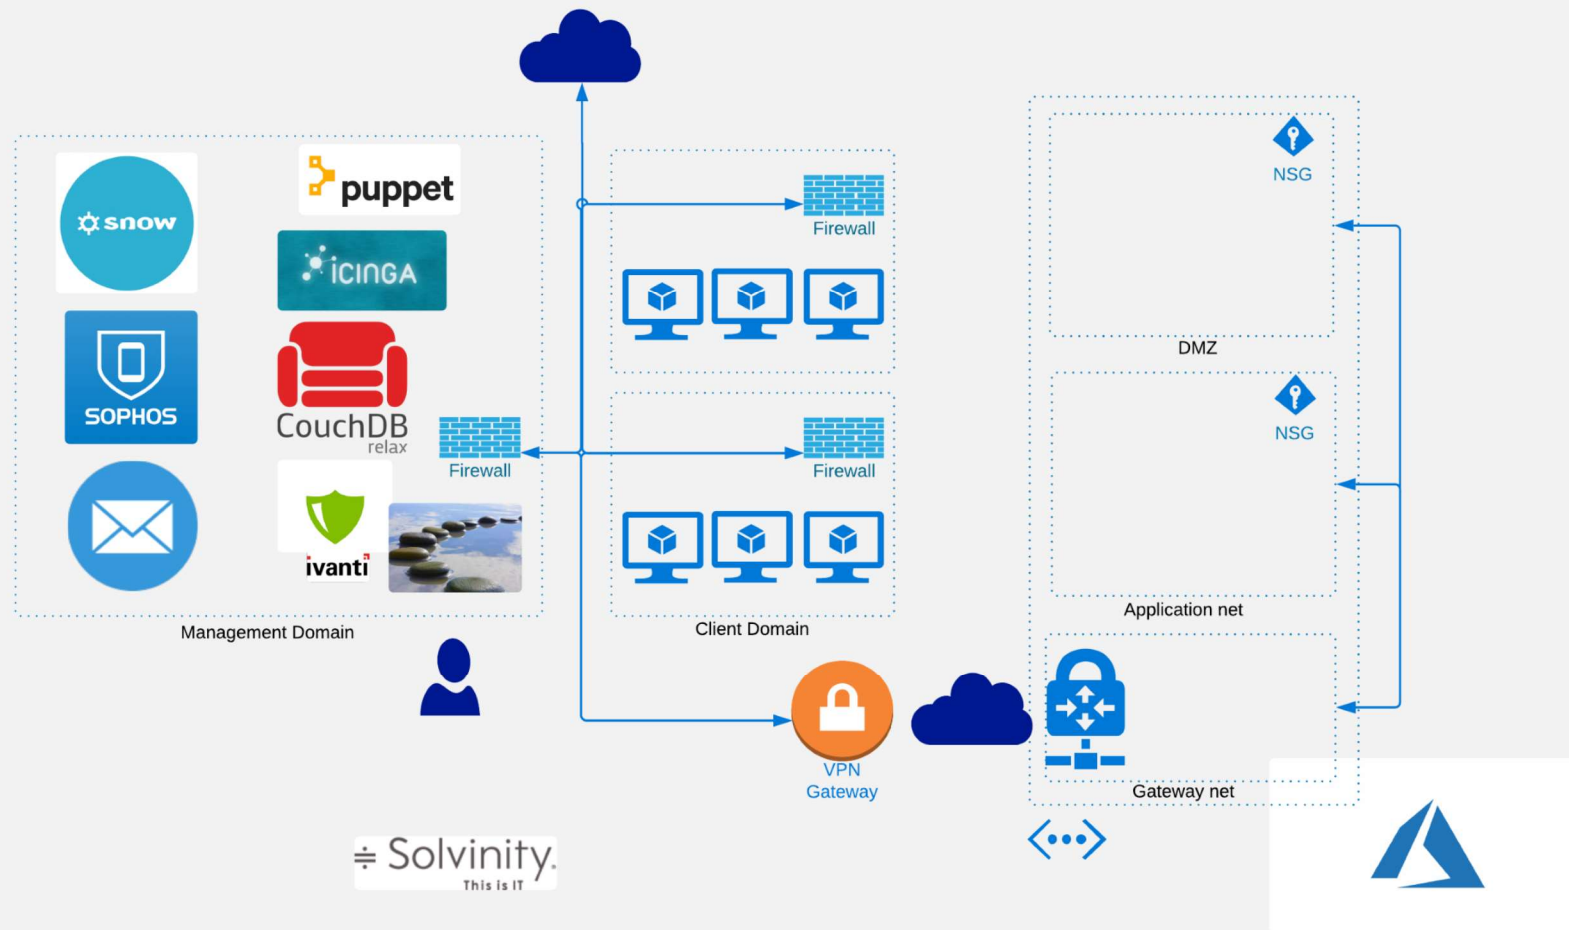

Flexibel

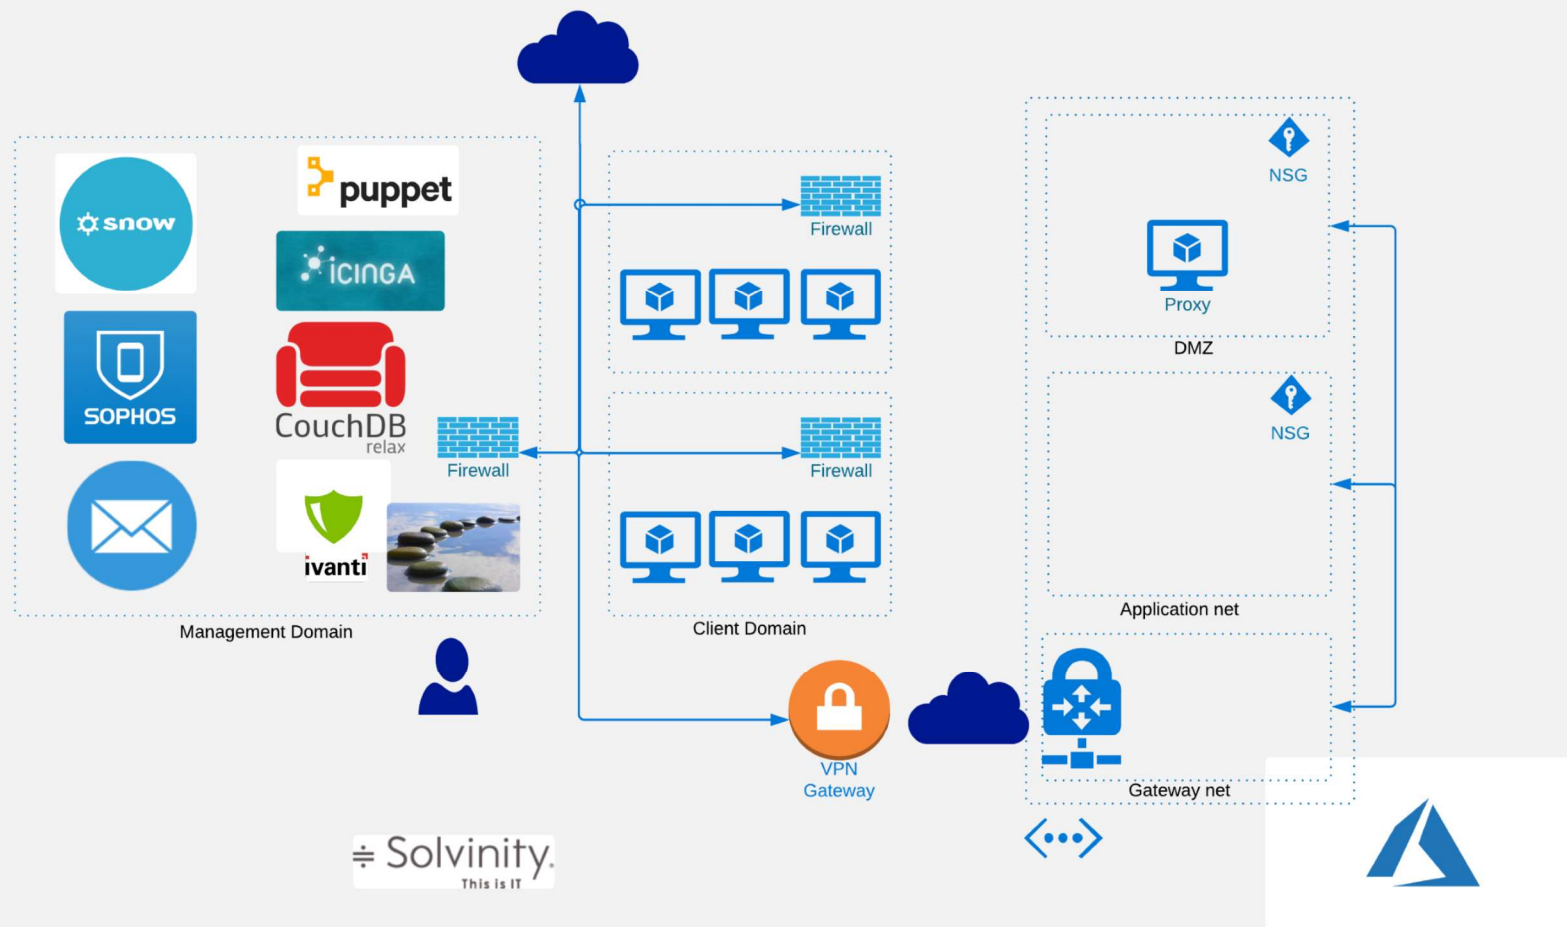

- Snel extra servers te deployen
- Zelf kunnen installeren en configureren

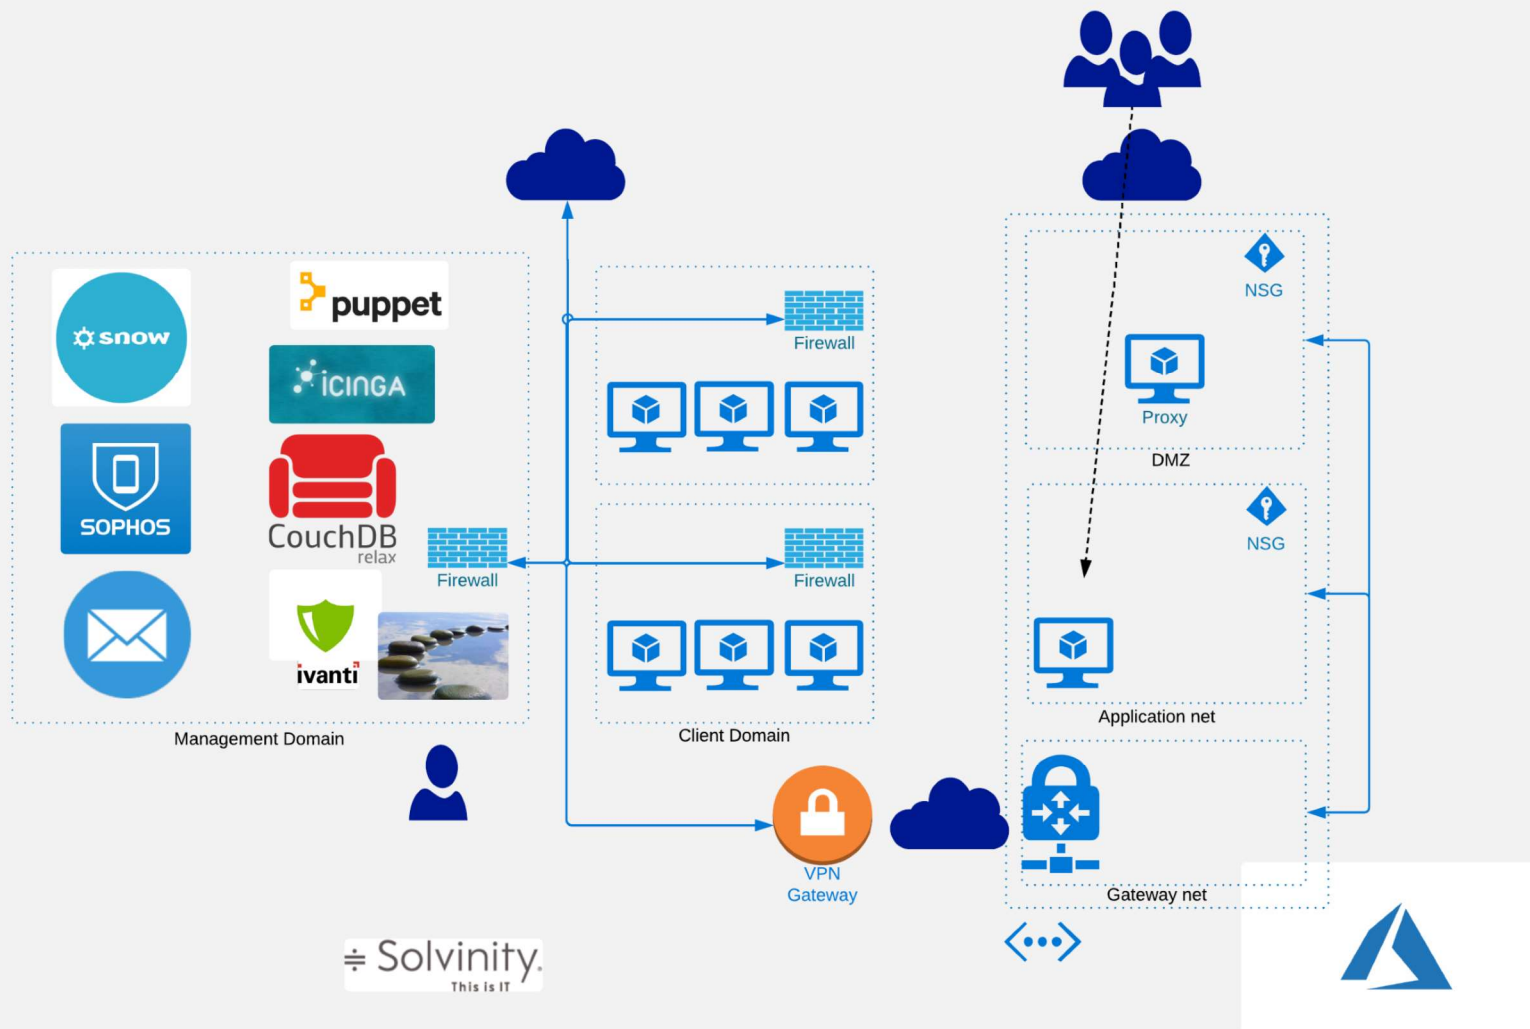

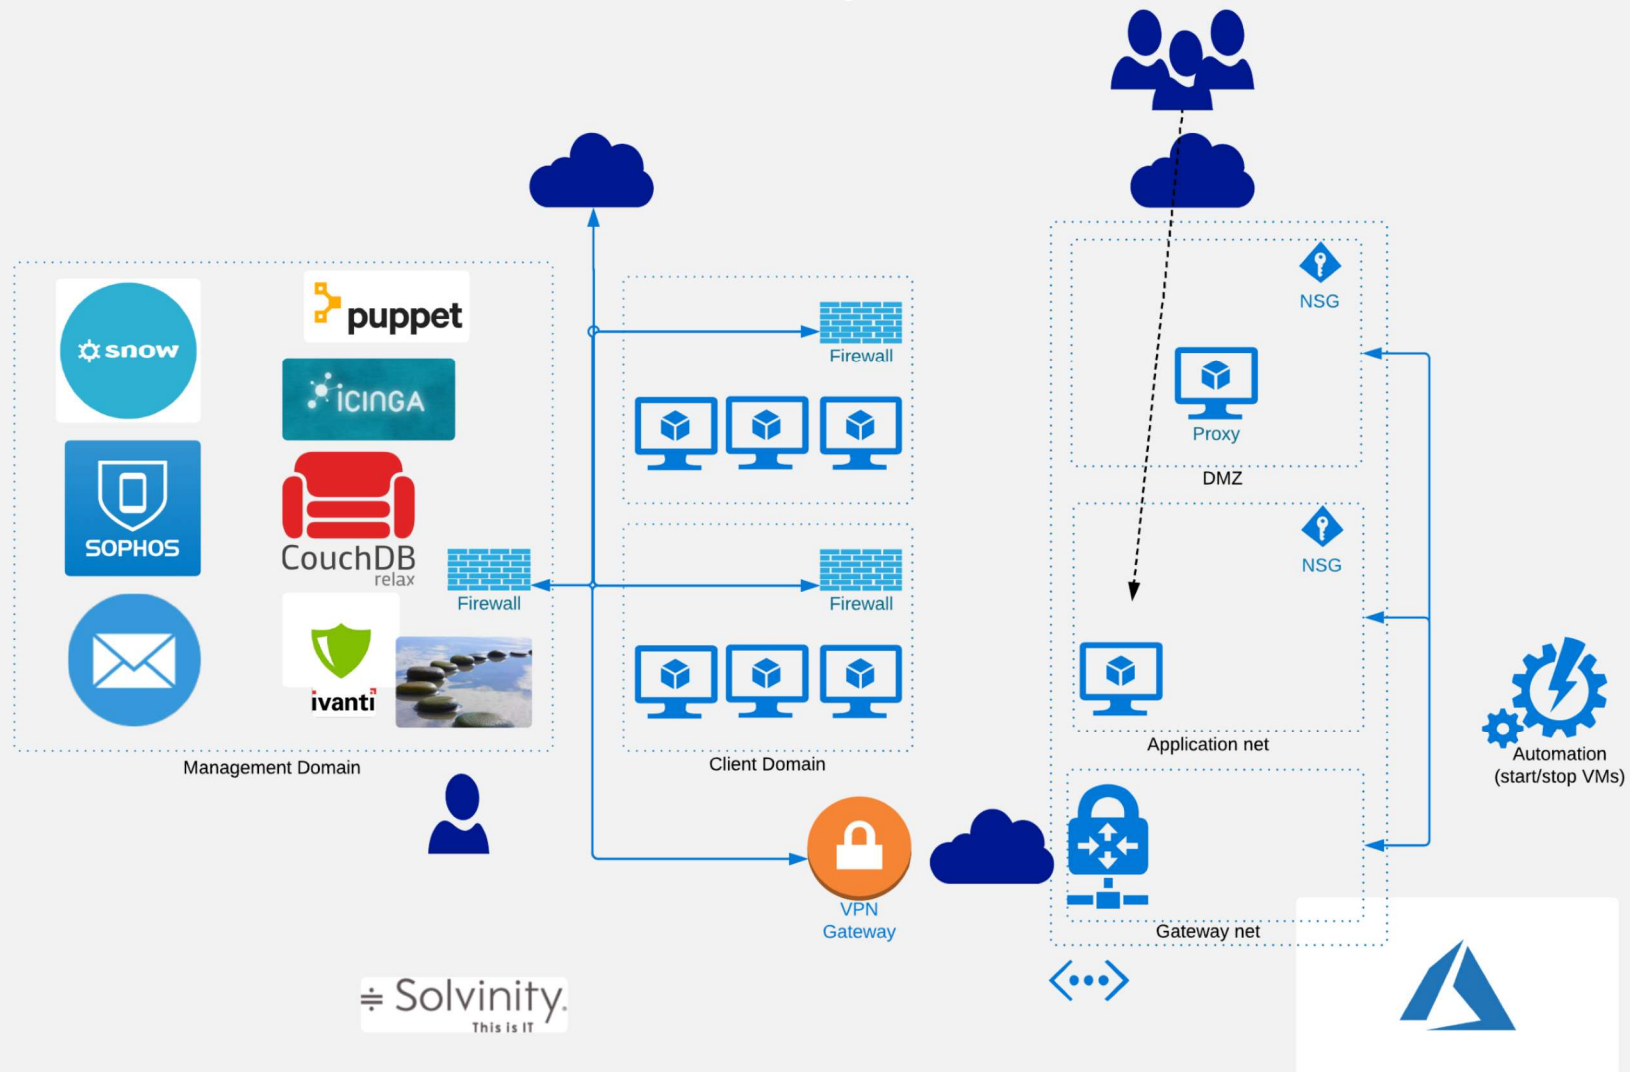

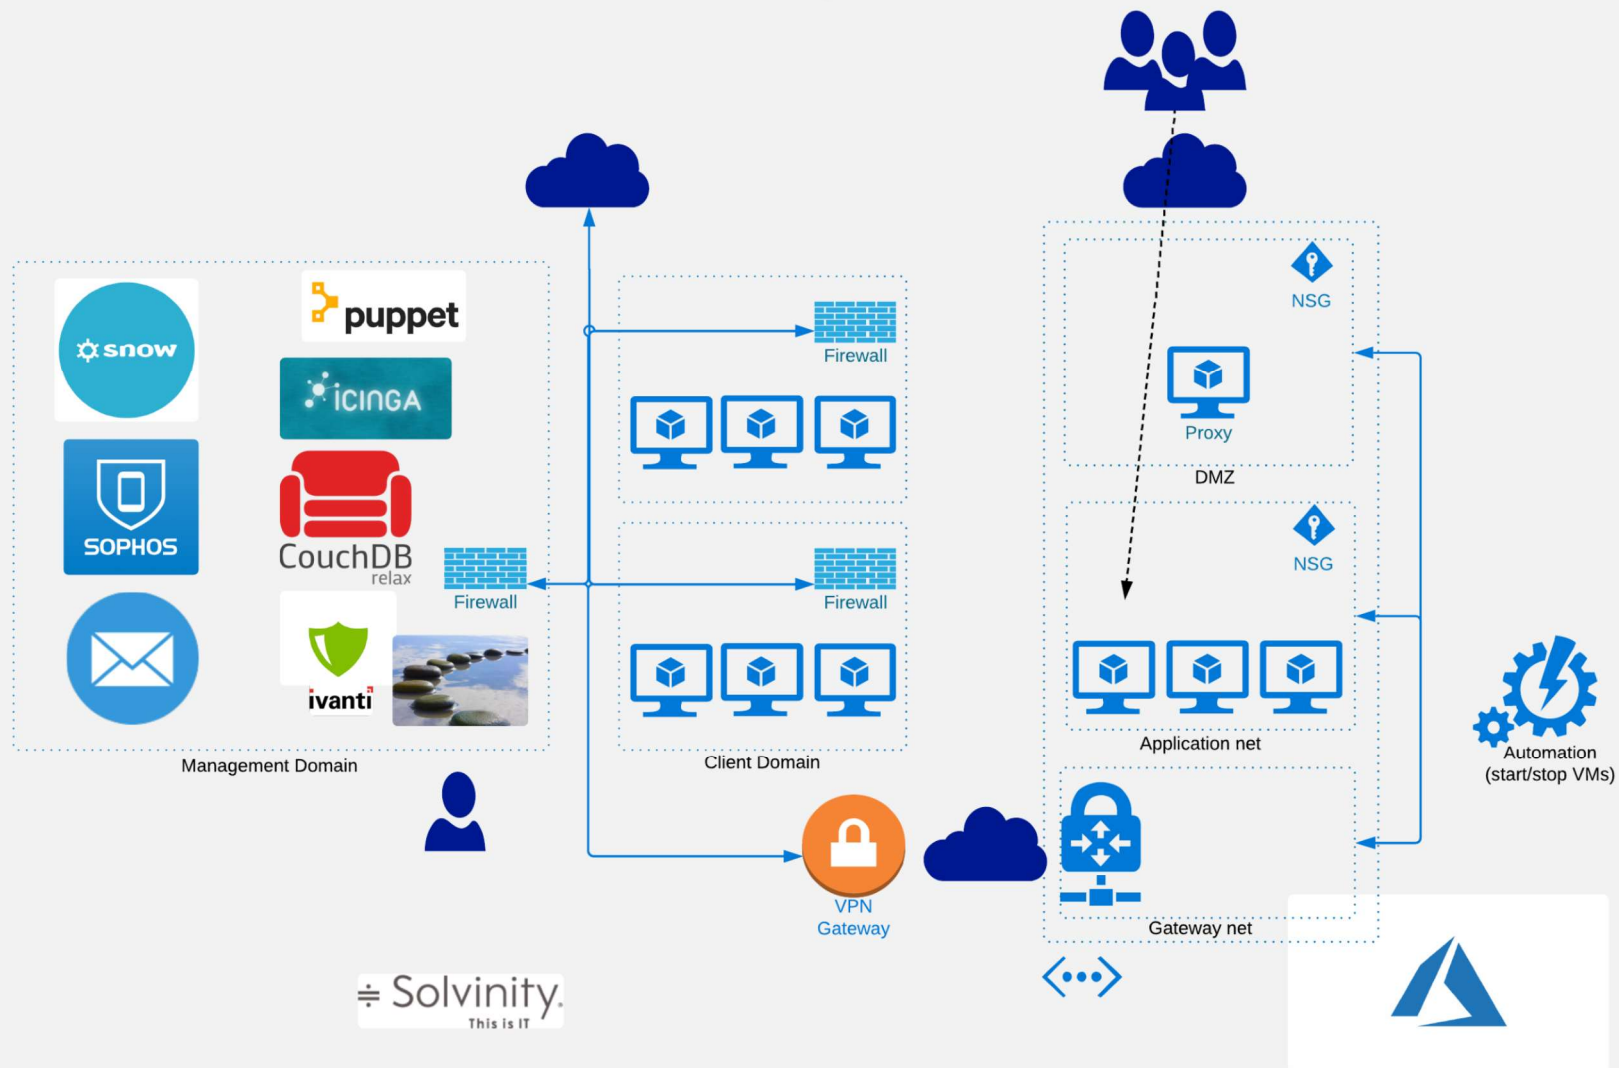

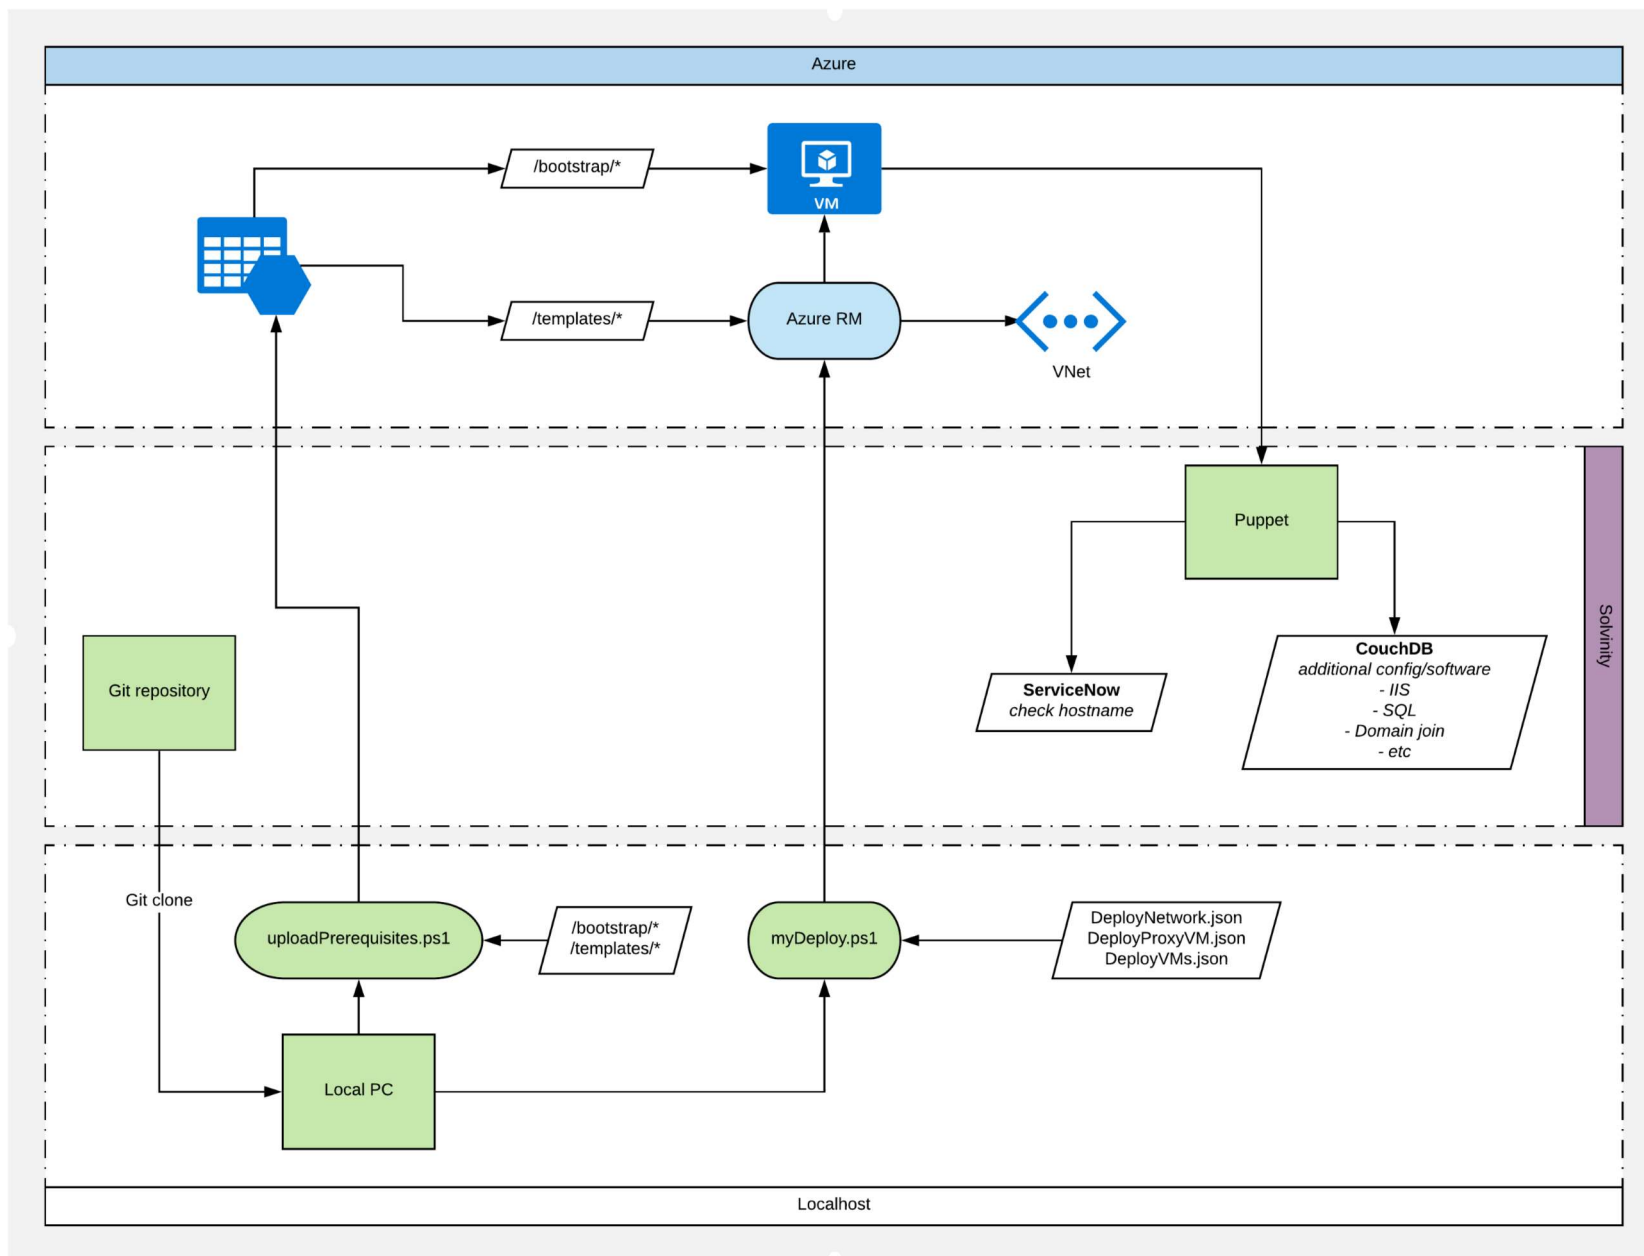

Hoe is de omgeving gedeployed?

- Azure volledig geautomatiseerd
 - Azure ARM templates
 - Puppet voor in de VM (puppet extension)
 - Powershell als 'glue' (custom script extension)
- In Solvinity cloud
 - VPN terminatie
 - Firewall ruling
- Monitoring
 - Vanuit Solvinity Cloud
